Response After Final

Amendments to the Claims

Please amend the claims as follows:

1-23. (canceled)

24. (currently amended) An article of manufacture, comprising, packaged together:
~~a unit dosage amount of an~~ a liquid odorant composition packaged in a container, the odorant composition comprising a mixture of odorants in a suprathreshold but not irritant concentration, said concentration of the odorants being greater than an average normal threshold concentration of the odorants, said concentration being about 25-55 decismel units and effective to alter blood flow to the vagina when inhaled by a female individual; wherein the odorant mixture is selected from the group consisting of a mixture of licorice-based and banana nut bread odorants, a mixture of licorice-based and cucumber odorants, and a mixture of baby powder and chocolate odorants; and
instructions for administering the odorant to alter blood flow to the vagina.

25. (currently amended) An article of manufacture, comprising, packaged together:
~~a unit dosage amount of an~~ odorant composition packaged in a container, the odorant composition comprising ~~one or more~~ a mixture of odorants in a suprathreshold but not irritant concentration, said concentration of the odorants being greater than an average normal threshold concentration of the odorants, said concentration being about 25-55 decismel units and effective to alter blood flow to the vagina when inhaled by a female individual, wherein the odorant mixture is selected from the group consisting of a mixture of licorice-based and banana nut bread odorants, a mixture of licorice-based and cucumber odorants, and a mixture of baby powder and chocolate odorants;
instructions for administering the odorant to alter blood flow to the vagina; and
at least one of the following, separately packaged elements:

- (i) a device for measuring blood flow to the vagina of the female individual;
- (ii) a device for administering a plurality of odorants for testing olfactory ability of the female individual; and

USSN 09/707,655

Response After Final

- (iii) a device for administering a series of odorants for testing olfactory threshold of the female individual.

26-27. (canceled)

28. (previously presented) The article of manufacture of Claim 24, wherein the odorant composition is packaged within a delivery device selected from the group consisting of a vial, jar, pouch, can, bottle, and a blister pack, ~~and a scratch and sniff odor patch containing microcapsules of the odorant composition.~~

29. (previously presented) The article of manufacture of Claim 24, wherein the odorant composition is ~~in a form contained with a delivery device~~ selected from the group consisting of a cloth scented cloth with the odorant composition, an aerosol spray device, a pump-type spray device, a nasal spray device, ~~a liquid or solid form of the odorant composition contained in a vessel having a cap, a liquid or solid form of the odorant composition contained in and a blister pack, and microcapsules of the odorant composition contained in a scratch and sniff odor patch.~~

30. (canceled)

31. (currently amended) The article of manufacture of Claim 24, wherein the odorant composition is ~~in a liquid form~~ contained in a dispenser comprising a capped vessel having a tip impregnated with the odorant composition.

32. (currently amended) ~~The~~ An article of manufacture of Claim 31, comprising, packaged together:

an odorant composition contained in a ~~wherein the dispenser comprises~~ comprising a capped vessel having a tip impregnated with the odorant composition;

the odorant composition comprising a mixture of odorants in a suprathreshold but not irritant concentration effective to alter blood flow to the vagina when inhaled by a female individual; wherein the odorant mixture is selected from the group consisting of a mixture of

USSN 09/707,655

Response After Final

licorice-based and banana nut bread odorants, a mixture of licorice-based and cucumber odorants, and a mixture of baby powder and chocolate odorants; and
instructions for administering the odorant to alter blood flow to the vagina

33. (previously presented) The article of manufacture of Claim 32, wherein the dispenser contains the odorant composition absorbed to a wicking material.
34. (canceled)
35. (currently amended) An article of manufacture, comprising, packaged together:
~~a unit dosage amount of an~~ a liquid odorant composition packaged in a container, the odorant composition comprising a suprathreshold but not irritant concentration of a mixture of a licorice-based odorant and a cucumber odorant effective to alter blood flow to the vagina when inhaled by a female individual, said concentration of the odorants being greater than an average normal threshold concentration of the odorants at about 25-55 decismel units; and instructions for administering the odorant to alter blood flow to the vagina.
36. (previously presented) The article of manufacture of Claim 24, wherein the odorant composition and the unit dosage amount of the odorant composition is effective to increase blood flow to the vagina of the female individual by about 10-30%.
37. (canceled)
38. (previously presented) The article of manufacture of Claim 24, wherein the odorant composition and the unit dosage amount of the odorant composition is effective to decrease blood flow to the vagina of the female individual by about 10-20%.
- 39-40. (canceled)

USSN 09/707,655

Response After Final

41. (currently amended) An article of manufacture, comprising, packaged together:
~~a unit dosage amount of~~ an odorant composition packaged in a container, the odorant composition comprising a mixture of [a] baby powder and chocolate odorants in a suprathreshold but not irritant concentration effective to increase blood flow to the vagina when inhaled by a female individual; and
instructions for administering the odorant composition to increase blood flow to the vagina.
42. (previously presented) The article of manufacture of Claim 41, wherein the odorant composition and the unit dosage amount of the odorant composition is effective to increase blood flow to the vagina of the female individual by about 10-30%.
- 43-44. (canceled)
45. (currently amended) An article of manufacture, comprising, packaged together:
~~a unit dosage amount of~~ an odorant composition ~~packaged in a container~~ in the form of microcapsules contained in a scratch-and-sniff odor patch, the odorant composition comprising a suprathreshold but not irritant concentration of a mixture of a licorice-based odorant and a cucumber odorant effective to ~~decrease~~ alter blood flow to the vagina when inhaled by a female individual, said concentration of the odorants being greater than an average normal threshold concentration of the odorants at about 25-55 decismel units; and
instructions for administering the odorant to decrease blood flow to the vagina.
46. (previously presented) The article of manufacture of Claim 45, wherein the odorant composition and the unit dosage amount of the odorant composition is effective to decrease blood flow to the vagina of the female individual by about 10-20%.
- 47-48. (canceled)
